

At Brentwood Family Pet Care we love your pets and think of them as our family.

We want only the best for our clients, as well as their loved ones.

That's why we offer a complete Puppy Wellness Program which includes the very best medicine for your precious new puppy as well as a substantial savings for you.

The attention you pay to your new puppy's well being will also pay off later as you continue to provide them with the quality care that they deserve. Through annual exams, blood work and vaccines your puppy will live a long and happy life and bring your family many years of joy.

Why spay or neuter your pet?

One of the kindest things you can do for your puppy is to have him spayed or neutered.

Millions of unwanted pets are euthanized every year because they do not have a home.

Generally performed at about 4 months of age, spaying or neutering can also reduce the risk of your pet developing cancer and other serious diseases.

It will keep your pet healthier and reduce unwanted behavior, such as roaming, inappropriate elimination or mounting.

We accept all major credit cards and Care Credit.

"Loving Your Pets Like You Do"

Puppy Wellness Program

925.240.PETS (7387)

Protecting your Puppy and Family from parasites

Puppies are vulnerable to parasite infestations that can seriously threaten their health and that of children. Most puppies are infected with parasites transmitted by their mothers. Your new puppy can also contract Heartworm disease from infected mosquitoes.

Parasites like Roundworms, Hookworms and Tapeworms can be transmitted to your family.

Always remind your family to wash their hands after playing with their puppy, no kissing on the mouth, pick up all feces as soon as possible and no bare feet where your puppy goes to the bathroom.

Thankfully we carry effective & affordable anti-parasitic heartworm preventatives as well as flea and tick control products that are safe for your entire family.

Be sure to ask your veterinarian for advice with choosing the right product for your puppy.

Vaccines

Vaccinations are one of the most important tools in keeping your puppy healthy. A puppy's immune system needs time to mature and get stronger. Therefore, it's very important to make sure that your puppy receives the right vaccination at the right time.

How do I know what's right for my puppy?

Your family's lifestyle as well as their breed will influence you and your veterinarian's decision on which vaccines are right for your puppy.

Some breeds may not have the need for a Rattlesnake vaccine but would definitely benefit from a Bordetella or Canine Influenza vaccine.

Is your family active? Will your pet be enjoying camping or hiking adventures with your family? If so, then the Lyme vaccine should be considered.

Your veterinarian, as well as our highly trained staff, is here to help you make the right choices for your new puppy.
